PROFESSIONAL SUMMARY

Front-End Developer with 4+ years of experience designing and developing scalable, high-performance single-page web applications (SPA) at Tata Consultancy Services (TCS). Proficient in Angular, TypeScript, JavaScript, HTML5, CSS3. Experienced across BFSI and Semiconductor domains. Strong background in performance optimization, reusable component architecture, Agile/Scrum methodologies, and cross-functional team collaboration. Committed to delivering clean, maintainable, and production-ready front-end solutions.

TECHNICAL SKILLS

Frontend Technologies: Angular (2+), Angular Material, TypeScript, JavaScript, HTML5, CSS3, SCSS, Signals, Standalone Components, RxJS, NgRx, Reactive Programming

Web Concepts: Single Page Application (SPA), Lazy Loading, Responsive Design, Component Architecture, Cross-Browser Compatibility, Performance Optimization

Backend and APIs: RESTful APIs

Version Control: Git

Tools and Platforms: GitLab, Postman, AKS, Pgadmin, ServiceNow

Database: MongoDB, PostgreSQL

Methodologies: Agile, Scrum, Code Review

Monitoring Tools: Splunk, Grafana

PROFESSIONAL EXPERIENCE

Tata Consultancy Services (TCS) –Hyderabad, India

Angular Developer / Product Engineer December 2021 – Present

Project: ASML AMSPLUS ERP SAP SLM OFF – Semiconductor Domain

- Provided end-to-end production support for full stack applications, reducing critical system downtime
- Designed reusable Angular(v19) components using Angular Material, improving UI consistency and reducing development time across teams
- Optimized application performance using lazy loading, Signals and REST API call optimization
- Leveraged RxJS operators (switchMap, mergeMap, combineLatest) for efficient asynchronous data handling and reactive state management
- Monitoring applications using Splunk for deep log analysis and Grafana for unified, high-level metrics visualization.
- Participated in Agile sprint planning, peer code reviews, and enforced coding standards and best practices.

Project: Xerox AMS-ESU – Customer Service Management

- Engineered end-to-end inbound and outbound REST API integrations to seamlessly connect ServiceNow with external enterprise systems and databases.
- Designed a robust data pipeline that ingests external data into staging tables and maps it securely to target tables using transform maps.
- Automated a 5-minute schedule job to continuously pull external system data into the CSM module, ensuring real-time case data availability.
- Managed the complete ServiceNow ticket lifecycle, optimizing Incident Management, Service Requests, and Customer Service Management (CSM) workflows.

Project: State Street – BFSI Domain

- Developed scalable web application using Angular 13, leveraging Ivy rendering, lazy loading, and onPush change detection to optimize page loading speed.
- Engineered robust state management and asynchronous data streams using RxJs operations and NgRx, minimizing memory leaks and UI race conditions.
- Integrated secure REST APIs using token-based authentication following industry-standard security practices
- Collaborated in Agile/Scrum teams for iterative delivery, sprint reviews, and defect resolution.
- Implemented unit testing across Angular feature modules, ensuring code reliability in a large-scale financial application.

EDUCATION

Bachelor of Technology (B.Tech) –Electronics and Communication Engineering

DNR College of Engineering and Technology | 2021

CERTIFICATIONS

- Certified System Administrator - ServiceNow
- Angular – The Complete Guide (Udemy)
- JavaScript Intermediate Certificate
